

Specialty Installations

Specialty Installations – Bill Klaser, a very quality minded person, was persistent in learning every aspect of his trade. Bill studied under tile masters in the USA as well as in Germany. Not only does Bill have a knack for engineering, but he also has an artistic ability that makes him a very accomplished craftsman and a legend in his own time. Bill in turn, has taught these skills to his sons and to others who work for Klaser Tile. Industry standards are meticulously followed and many quality control procedures are employed to ensure their installers' compliance. Klaser Tile only uses the best installation methods and the best installation products to further ensure a lasting installation.

Klaser Tile has extensive experience with Venetian Glass Mosaic Tile. This exquisite glass product that has been used over the ages since before Roman Times is not easy to install. Only specially trained and experienced installers can successfully install this specialty product. Klaser Tile has the know-how and the experience to apply this glass tile to domes, Roman bathtubs, and fully-tiled swimming pools and spas.

Klaser Tile ideally takes full control of the process and recommends installation methods relative to the application and the products being used.

Domes – Klaser Tile has installed many tiled domes over the years. It is one of the few companies qualified and capable to install a dome roof. This type of application is very complex and it is very crucial that it is installed correctly, both from the point of safety, and to ensure it fully functions as a

roof. The layout of a dome is mathematically complex, but essential in getting a final product that not only functions correctly, but provides the artistic value for which it was designed.

Roman Bathtubs – Klaser Tile was taught by the best tile masters on how to install fully-tiled bathrooms with Roman Bathtubs. Klaser Tile has many years of experience in this field using everything from Ceramic Tile to Venetian Glass Mosaics. Klaser Tile takes these projects from bottom up to create artistic finished products.

Fully-Tiled Swimming Pools – Klaser Tile has taken his Roman Bathtub skills and experience and has installed many fully-tiled swimming pools. Often the product of choice is Venetian Glass Mosaic Tile, but other ceramic tile mosaics have also been used. With all the different curves and angles of a swimming pool or spa, the layout is mathematically complex, but essential at achieving an aesthetically pleasing finished product.

Snake Sidewalk – Klaser Tile has installed one snake sidewalk, and it was a challenge. They took full charge at engineering and implementing Alexis Smith's design of this unique 600 foot sidewalk at UCSD Campus library. First Klaser Tile designed the concrete substrate and placed it methodically to give the relieved and convex feel of a snake. Then they took the specified variety of natural slate and granite and placed it to give the sidewalk an authentic snake look and feel. Klaser Tile has the technical know-how and the artistic ability to create any piece of art.

Commitment to Quality – Klaser Tile is committed to providing a quality finished product by installing it correctly and providing it on time.
